Authorized as Second Class Mail Post Office Department, Ottawa

VOLUME 31: No. 44

ACME, ALBERTA, THURSDAY, December 4th, 1952

\$2.00 a Year; 5c a Copy

We regret to report our editor, Mrs. Harry Hunt, has undergone two operations recently and is confined to Drumheller hospital which explains the lack of news.

Beef Club

The Swalwell Beef Club held their first meeting Saturday, Nov. 29th.

The following officers were elected:
President Fred Penner
Vice-President .. Lloyd Penner
Sec.-Treas. Marvin Loewen
Club Reporter . Harvey Toews

The Swalwell and Avondale Beef Clubs held a meeting at the home of Mr. Wm. McDonald on Dec. 6.

After judging eight of Mr. McDonald's bulls, Mr. Toole from the Swift-feed division gave a talk on feeding calves. The ladies of the district brought the afternoon to a close with a very delicious lunch. The two clubs will hold their next meeting in the Swalwell Community Centre Jan. 3.

Experimental Sub-Station At Ralph Brown's Farm

Officials at the Dominion Experimental Station, Lacombe, advise that authorization has been received from Ottawa to establish a District Experiment Substation on the farm of Mr. Ralph Brown. Mr. Brown's farm is located a few miles east of Acme. This Substation will be one of several already established and located throughout Central Alberta.

The station an Acme will be for the purpose of studying local farming problems. Some of the studies will be on crop rotations, use of fertilizers, cultural practices, adaptability of range and cereal crops or other farming problems in the district.

The object of these studies will be to find means and ways of improving the productivity of the soil. Experimental work on the station will begin next spring.

EXAMINE THE GRAIN

Entomologists of the Science Service Centre at Lethbridge are advising farmers to examine grain. Heating is reported from several points, and grain mites and rusty grain beetles have been found in samples received. Grain both in bins and piles is affected. Dr C. W. Farstad, Officer-in-Charge of the Field Crop Insect Laboratory, suggests that if the grain is examined now, the trouble can be detected in the early stages and prompt action taken.

This situation may be more widely spread than present reports indicate. Higher than usual fall temperatures over wide areas have created conditions favourable to development of the pests mentioned. Unless checked in early stages, these pests can cause serious damage.

Grain mites are tiny, whitish, slowly moving, spider-like creatures. A disagreeable, sweetish odour of the infested grain betrays their presence. The rusty grain beetle is an active, reddish-brown beetle, about one-sixteenth of an inch long. Both pests feed on the germ of the grain and their activity can quickly extend the area of heating. When examining stored grain, probe beneath the surface. Heating usually occurs towards the centre of the bin or pile.

Cooling is the remedy. This can be done on the farm with a fanning mill, auger, combine or threshing machine. By passing the grain through one of these machines the warm spots are broken up and activity of the grain can be kept from contact with the damp ground with a good layer of straw. The piles should be kept small with not more than one thousand bushels in each pile.

Level Land

Mr. and Mrs. Emil Yanke and their youngest daughter of Lodi, California were in this district last week, and visited at the home of Mr. and Mrs. John Leske for a short time. The Yankes at one time lived in this district, at present they operate a nursing home in California.

Mr. and Mrs. James Suelzle spent the week end in Leduc and Edmonton, visiting with friends.

Mr. and Mrs. Sam Leiske and family were visiting at Lacombe over the week end. Danny Leiske went along entering the Lacombe hospital and undergoing an operation on Tuesday morning.

Mr. Jacob Dais who was in this district for a few months, left for his home at Kelowna, B. C.

Don Buyer and Lawrence Neher, Phyllis Schuler of Edmonton and Marjorie Leiske of Lacombe were in the district last week to attend the 4H Club Banquet in the Carbon Hall and left the same night.

Elwood Leiske was visiting his folks for a few days.

Hydraulic HOISTS FOR TRUCKS

Due to the fact that we are unable to supply all hoist orders during the fall season we suggest that you place your order early, and accept our following offers:

LINDEN HOIST--8 ton twin cylinder, 12 ft Tilting Sills **\$495**
\$10 extra for each additional foot

Linden Hoist for 1 ton trucks with steel box \$350
Weston Front Mount Hoist..... \$316

5 percent discount on orders received before Jan. 20th with a deposit of not less than 10 percent.
Power Take Off and Installing Hoist Extra.
Bigger hoists made according to specifications.

New Oil Strike Reported From Virden, Manitoba

WINNIPEG.—Bailey Selburn Oil and Gas Limited announced that oil has been discovered in an exploratory well about five miles northeast of the Virden oilfield, 200 miles west of Winnipeg.

The company said it recovered 150 feet of fluid in the drill pipe during a formation test of its Baysel-California Standard-Hargrave No. 2-21 well near Hargrave, Man. Ninety feet of fluid was gassed oil; the remainder light crude similar to that produced in the Virden field.

BAGS BANDED DUCK

Ed Lang is the latest Brandon hunter to bag a banded duck. He brought down a Redhead at White-water marsh with U.S. Wildlife band No. 496-78786. Lang is forwarding the band to the Washington headquarters of the Wildlife service.

For Quick Cough Relief Mix This Syrup In Your Home

Thousands of Canadian housewives have turned to this well-known recipe for relieving coughs due to colds. It's easy to prepare, and gives you four times as much for your money.

Your usual drug counter can supply you with a 2½ ounce bottle of PINEX CONCENTRATE. Pour this into a 16 ounce bottle and fill up with granulated sugar syrup, or honey or maple syrup. To make the sugar syrup, simply mix 2 cups of sugar with one cup of water... no cooking needed, and it takes but a minute. Now you'll have an ample supply of fast acting, effective cough syrup for the whole family, so pleasant tasting the children will like it.

PINEX—a concentrated blend of proven ingredients—must help or your money refunded. Get a bottle today!

PINEX FOR COUGHS—EASY—ECONOMICAL

VIGOROUS HAIR POSITIVELY RESTORED

OR YOUR MONEY REFUNDED Here is the answer to thinning hair or baldness. Thalia Hair Restorer (Formula TH.10) which has been perfected from an old European formula, revives and restores a healthy, normal head of hair. It is simple and pleasant to apply. Unsolicited letters from all parts of Canada indicate its phenomenal success. Each course of treatments is backed by a full guarantee that hair will be restored OR YOUR MONEY WILL BE REFUNDED. Write for full information to Dept. W13

THALIA HERBAL PRODUCTS LTD., 4353 W. 10th Ave., Vancouver 8, B.C.

REAL HELP FOR Your Itching Piles OR NO COST

If Hem-Roid, an internal pile treatment, does not quickly ease the itching soreness and burning pain of your piles—it costs you nothing. Get a package of Hem-Roid at any drug store and use as directed. You will be pleased at how quickly your pile trouble is relieved. Only \$1.59 for the big 60 tablet package. If you are not 100% pleased after using Hem-Roid 2 or 3 days, as a test, ask for your money back. Refund agreement by all drug stores.

No Shortage Of Cars To Move Prairie Grain

EDMONTON.—Officials of the Canadian Pacific and Canadian National Railways said that they have sufficient boxcars available to move the amount of prairie grain that can be handled at the lakehead and west coast terminals.

Vice-President J. R. McMillan of the C.N.R. and Vice-President D. S. Thomson of the C.P.R., both from Winnipeg, were in Edmonton inspecting company facilities.

Mr. McMillan said his company and the C.P.R. are "using all the cars needed" to keep up with the terminal requirements on Prairie grain.

He said to date the terminals have been able to handle the grain no faster than the railways have been able to ship it.

Mr. McMillan said Saskatchewan and Manitoba grain is not being given priority over Alberta grain because those provinces are closer to the Lakehead, thus enabling more shipments to be made than on the longer haul.

"Grain is moved on orders of the Wheat Board and the Federal Transport Controller," Mr. McMillan said. "The quota system determines how much grain will be transferred from any given area."

Funny and Otherwise

"Where you nervous," asked young Mrs. Dobson, "when you asked Daddy to give his consent to our marriage?"

"He gave me the fright of my life," grunted Dobson. She is still wondering what he meant.

A passenger on a British express train lost his hat and pulled the emergency cord. In court his explanation was simple: he wanted to get his hat back.

"Is my hat on straight, dear?" "Yes, yes! Now will you please hurry—we're a mile late."

"I'm sorry, but I'll have to go back. This kind of hat isn't supposed to be worn straight."

"Whatever's come over your husband Mrs. Raggars?" asked Mrs. Withers of her neighbor. "E does nothing but sit and brood on the doorstep with 'is chin in 'is hands.'" "E ain't brooding," replied Mrs. Raggars. "E's practising for the local chess tournament."

First Private—Had a horrible dream last night. It seemed we were ordered to a city chockful of swell looking girls.

Second Private—What's horrible about that?

First Private—The air force got there first.

"Men are only grown-up boys," says a woman novelist.

The child who used to take the clock to pieces to see how it works now does the same to his car to see why it doesn't.

"It's great fun at our choral society. We have a few drinks, play cards, and if our wives turn up, we dance."

"And when do you sing?"

"On the way home."

"My husband plays tennis, swims, and goes in for physical exercises. Does your husband take any regular exercise?"

"Well last week he was out seven nights running."

Fast Service For Mail Posted To Soldiers Overseas

OTTAWA.—Soldiers throughout Europe should get letters posted from Canada within three days.

The army announced that a nucleus postal depot has been set up at London, Eng., to expedite the flow of mail to and from Canadian soldiers and airmen stationed in Europe.

The new depot, designed to expand in case of emergency, will be commanded by Lt. H. J. Cobbald, of Toronto.

Rice is the staple food for more than half the world's population.

FINANCES SOLID PRINCE ALBERT.—Prince Albert recorded a civic surplus for the third

consecutive year. The financial statement for 1951, presented to council recently, showed a surplus of \$6,749.

MAGIC makes baking fine-textured, delicious!

CINNAMON SANDWICH BISCUITS

Mix and sift once, then sift into a bowl, 2 c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, ¼ tsp. salt and ¼ c. fine granulated sugar. Cut in finely 4 tbs. chilled shortening. Combine 1 well-beaten egg, ½ c. milk and ½ tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork, adding milk if necessary, to make a soft dough. Knead for 10 seconds on lightly-floured board and roll out to ⅜" thickness; shape with floured 1½" cutter. Cream together 1½ tbs. soft butter or margarine, ¼ c. lightly-packed brown sugar, ½ tsp. grated orange rind and ½ tsp. ground cinnamon. Using only about half of the creamed mixture, place a small spoonful of the mixture on half of the cut-out rounds of dough; top with remaining rounds of dough and press around edges to seal. Spread biscuits with remaining creamed mixture and arrange, slightly apart, on greased cookie sheet. Bake in hot oven, 450°, about 12 minutes. Serve warm. Yield—16 biscuits.

New Map Of Canada To Be Issued Soon

OTTAWA. — A new map of Canada will soon be rolling off the presses giving an up-to-date topographical picture of the country from the 49th parallel to the Pole.

The 100-mile-to-inch map is the first new one in 22 years and will give an accurate picture of Canada's northland right up to and including the polar ice cap.

In addition Newfoundland, which joined Confederation in 1949, gets on the map as part of Canada for the first time.

Col. E. D. Baldock, Canada's chief cartographer, said it will be "the finest map Canada has ever produced."

The new map, square instead of oblong, will include all the latest information about the northland. Islands, lakes, rivers and towns previously not shown or unknown, will be put on the map.

Because of its projection and shape the new map includes part of Russia, colored white, at the left edge. On the extreme right Iceland appears.

Also mapped for the first time are two islands discovered by the R.C.A.F. in Foxe Basin, south of Baffin Island. One is named after the heir to the throne, Prince Charles, and the other is simply called Air Force Island.

The 36-inch-square map will have some 7,000 place names. The only roads shown will be those in the north and the Alaska Highway and the Mackenzie Highway. No attempt will be made to show roads in the more southerly areas but all railways will be shown.

Compilation of the map has taken two years.

GEMS OF THOUGHT

TIME

We always have time enough, if we will but use it aright.—Goethe.

Time is cried out upon as a great thief; it is people's own fault. Use him well, and you will get from his hand more than he will ever take from years.—Elizabeth Wetherell.

All successful individuals have become such by hard work; by improving moments before they pass into hours, and hours that other people may occupy in the pursuit of pleasure.—Mary Baker Eddy.

Improve your opportunities . . . every hour lost now is a chance of future misfortune.—Bonaparte.

Spare moments are the gold dust of time; — of all the portions of our life, the spare minutes are the most fruitful in good or evil.—Hall.

Well arranged time is the surest mark of a well arranged mind.

—Sir Isaac Pitman.

A British pair cleverly exploited minimum values in a match against Norway. In Room 1 the Norwegian North raised South's One Diamond to Two. East doubled and South bid Three Diamonds.

West was just strong enough to continue the one-suit chorus with Four Diamonds, and East bid Four Hearts—it often pays to play in the suit without tops. One Diamond and two trump tricks only were lost.

♠ 7 being discarded on Dummy's fifth Spade. East's judgment was vindicated by the result in Room 2 where West was defeated in Three Spades in spite of his stronger trump suit. South overtook ♦ K to return ♥ A and ♥ 3; a third Heart was ruffed, and there was no way to dispose of the losing Club. The deal shows the advantage of a trump suit divided 4-4.

The bottle tree is an Australian tree which has dense foliage and a short trunk that bulges like a round bottle.

GRAPE FESTIVAL MAKES ITS DEBUT IN CANADA—The grape festival at St. Catharines, Ont., first of its kind in Canada, lived up to its advance publicity by having a parade of festival floats, dances and singing by various European national groups, and, of course, a beauty contest. On this float which had a pair of live Indian maidens paddling a cardboard canoe through waves under a bower of oversize grapes—was Jeanette Lastowska, later chosen queen of the festival.—Central Press Canadian.

Total Of New Homes Completed In Canada This Year Will Fall Below Figure For 1951

OTTAWA. — Indications are that the number of new houses completed in Canada this year will fall far below the total for 1951.

The Bureau of Statistics reported that only 33,055 houses were completed in the first seven months of this year compared with 43,620 in the corresponding period of 1951, a decrease of 10,565.

The report showed that if the 1951 total is to be matched, 48,255 houses will have to be completed in the last five months of this year.

The number of houses started in the first seven months of the year totalled 44,050 compared with 44,588 in the corresponding period of 1951. In June and July starts totalled 11,095 and 8,759 compared with 9,514 and 6,123 for the corresponding months of 1951.

The bureau's report gave no reason for the decrease. The Crown-owned Central Mortgage and Housing Corporation, however, has blamed high costs and a shortage of mortgage money for the drop in construction activity.

The number of new houses completed by provinces in the seven-month period, with the corresponding figures for 1951 in brackets:

Newfoundland 453 (515); Prince Edward Island 16 (226); Nova Scotia 772 (1,091); New Brunswick 506 (534); Quebec 9,825 (13,174); Ontario 13,410 (18,584); Manitoba 1,029 (1,537); Saskatchewan 525 (772); Alberta 2,864 (3,226); British Columbia 3,655 (3,961).

BUILDING PLAYGROUND

WADENA, Sask. — Wadena town council recently decided to assist members of the local Masonic lodge in building a playground for children here. Council has offered to level the playground and will supply labor and equipment for the job. The lodge will supply the equipment.

On The Side : By E. V. Durling

Am constantly hearing from harassed wives suffering from snoring husbands. Now and then I hear from a subscriber who is kept awake by a snoring wife. Consequently I am always on the lookout for snoring cures. Here is one I heard of that is easy to check. The person afflicted with snoring lies flat on his back for ten minutes every night when retiring. During that period he engages in deep breathing. As he fills his lungs with air, he draws in his stomach. This exercise is claimed to have cured many a habitual snorer.

Medical Charm

Are you in love with a registered nurse, young fellow? If so, you may expect to have a dangerous rival in some young doctor. Practically all nurses fall in love with doctors. The more beautiful the nurse, the more heavily she falls.

Supreme Test

Have just heard of a man who had two teeth knocked out when he was a boy. He picked the teeth up and brought them home. His grandfather, a physician, promptly put the teeth back in his grandson's mouth. They are still firmly imbedded there today, 30 years later. Not only that, their possessor can crack walnuts with them. So, who says teeth can't be replanted or transplanted?

Feminine Superiority

Physically the female is the superior sex. That I am prepared to admit. As to their mental superiority, I am holding that open for discussion. Let us consider the angle of physical endurance at this session. I have on hand a communication from a feminine subscriber who says she is employed as a telephone operator and works a full five-day week as such. She is married and has three daughters aged nine, ten and fifteen. She makes all her own dresses and all those of her daughters. She does all her own housework, including cooking, washing, ironing, cleaning, etc. Imagine the physical endurance necessary to handle a working schedule like that. I doubt if there is a man alive who could stand it.

Subtle Distinction

Fellow I know refers to his wife as the "management". She doesn't care for the idea, but says: "At least it is better than being called the ball and chain."

Beauty and Brains, Too

A brown-eyed honey blonde bacteriologist, with a degree in science, has won 50 beauty contests, including one for the title of Miss Britain. How is that for a combination of beauty and brains? She is Aileen Chase of Sussex, England. Following her being named Miss Britain, she was asked if that was not the greatest thrill of her life. She said it wasn't. Her greatest thrill was when she was made secretary of the Sussex branch of the Institute of Medical Technology.

"Mink Owner Preferred"

Have a letter signed "Three Smart Girls". It is from a trio of young business women of Manhattan. They say they decided to take an apartment together because they are all the same size, have exactly the same measurements. So they wear each others clothes, giving them all additional outfits. Seems a brilliant idea. Perhaps young women inserting advertisements offering to share apartment with other young women should include a line reading: "Please state measurements and extent of wardrobe." Or something to that effect.

Ripple Rock Off B.C. Coast Real Danger To Ships

VANCOUVER. — A rock 100 feet in diameter, lying just below the surface, rules the north-south marine traffic on the British Columbia coast with an iron hand.

Ripple Rock in the Seymour Narrows between Vancouver Island and the mainland, 100 miles north of here, is dreaded by mariners just as European seamen fear the Goodwin Sands in the Straits of Dover.

First recorded by Captain George Vancouver on his voyage of discovery of the B.C. coast in 1792, the rock has destroyed or damaged scores of vessels and hundreds of small boats, with the death of more than 100 men.

Thousands of ships and small craft bound to and from northern B.C. and the Alaskan ports must pass through the Seymour Narrows. Tides of 10 or 12 knots race through the channel, churning the water into a cauldron of whirlpools that can suck small boats under or dash big ships against the rock.

It is only during brief periods of slack water that ships can pass through.

The rock sits just below the surface. Between 1934 and 1945 the Canadian government spent large sums in an attempt to blast 30 feet off the top. It was heart-breaking and dangerous work. In 1945 nine men working on the project lost their lives when a whirlpool overturned their work boat.

Despite heavy anchors and lines made fast to the shores on both sides of the channel, barges stationed over the rock would not remain stationary long enough for proper drilling work.

They never made any real impression on the rock, and last June the project was abandoned.

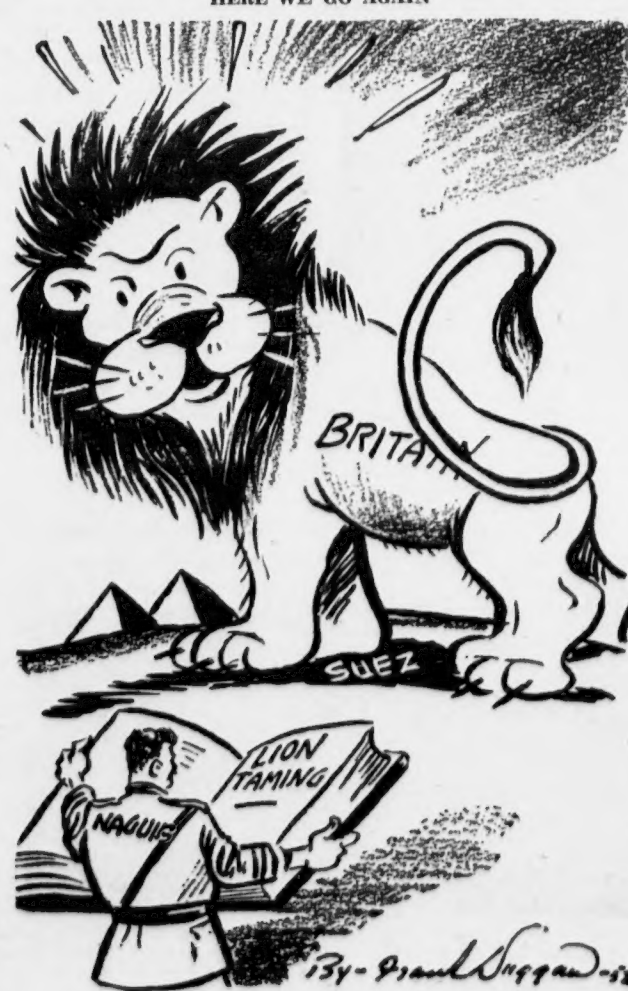

Some prominent engineering authorities in both the United States and Canada agree it is possible to blast the rock out. Mariners are waiting hopefully.

TRY AND STOP ME!

By BENNETT CERF

A chorus girl sued a rich playboy for breach of promise and was awarded the round sum of \$25,000 by a sympathetic jury. Emerging from the courthouse in an understandably happy daze, she was promptly run into by a truck and couldn't sit down for four weeks. For this mishap, however, she collected only two hundred dollars' damages in court. The moral of this sad story is clear: Never trifle with a fair maid's heart: kick her in the pants!

Puppy-teria Deluxe

Five orphan pups are fed assembly line style with this unpatented "puppy-teria". Nine days old when this picture was taken, the pups were orphaned when their English bulldog mother died shortly after their birth. Their Miami owner rigged up this feeding box for them, using baby bottles and nipples, and is feeding them the same formula used by his six-year-old son as a baby.

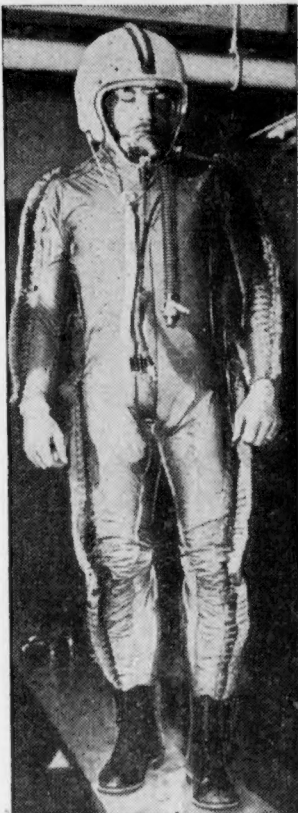

DOESN'T HAVE TO TURN AROUND—A view of the "EBR"—a Panhard armored car built by the French with U.S. machine tools supplied by the Mutual Security Administration. The 13-ton, eight-wheeled car carries a 75-mm. gun, and two drivers who sit back to back. At the flick of a lever the car can change direction instantly and dash off at 70 m.p.h. in the opposite direction to which it was going without turning around.—Central Press Canadian.

R.C.A.F. USES TARGET ROBOT PLANES—Near Deseronto, Ont., the R.C.A.F. have been experimenting with pilotless aircraft for some time. Purpose of the flights has been, so far, to provide aerial targets for gunners and the robot planes have all been controlled from the ground. Squadron Leader A. M. Sharpe, (left), is a camp commandant and here he inspects the parachute release cable with W. McCracken. The parachute is released by ground control to bring the robot safely to the ground.

The robot plane has a wingspan of 11 feet and a 72-horsepower gasoline engine which gives a speed of close to 300 m.p.h. It flies always at full throttle and cannot be directed to land safely by the ground operator.—Central Press Canadian Photos.

HIGHEST FASHION—Test pilot A. M. Johnston may resemble a visitor from Mars, but actually he's modelling in Washington the new high altitude suit. It enables pilots to live in the near-vacuum of the upper atmosphere, providing protection in the event cabin pressurization is lost in high altitudes.

SUCCEEDS SCHUMACHER—Erich Ollenhauer, (above), scored an overwhelming victory on being elected chairman of the West German Social Democratic Party. Selected to succeed the late Dr. Kurt Schumacher, Ollenhauer's election dashed the hopes of government politicians who thought the struggle for Schumacher's position would split the party.

—Central Press Canadian.

HONG KONG IS HAVEN FOR FORMER PRISONERS OF REDS—Roman Catholic Sister Vincent Louise de Lude, of Detroit, Mich., member of the Order of Sisters of Charity; Bishop John O'Shea, of Deep River, Conn., (centre), and the Rev. Fr. Jules Meyrat, 67-year-old Swiss priest, are seen on their arrival at Hong Kong from Communist China, where they were imprisoned by the Reds and later expelled. The false charges levelled by the Red Chinese against them included: Bishop O'Shea accused of helping "imperialist aggression"; Sister de Lude charged with "corruption" and Father Meyrat, convicted for "imperialistic activity."

BLIND VET BICYCLES THROUGH EUROPE—This tandem bicycle was the sole means of travel for blind David Ferguson and his wife, who arrived back in Canada after a 1,100-mile tour of Europe. Ferguson, a Torontonians, was blinded in World War II.—Central Press Canadian.

PRO-AMERICAN SEES HIS PARTY WIN—Ichiro Hotoyama, former head of Japan's pro-American Liberal party, is shown with his wife as they cast their ballots in national election. The Liberal party, under Premier Shigeru Yoshida, retained power and the Communists took a bad beating, failing to win a single seat in the Diet. In the last parliament the Red party had 22 representatives.—Central Press Canadian.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

What Is A "Natural Athlete?"

In answering this very popular question, the smart thing to do will be to get one thing settled right now and that is—every single person who was born mentally and physically sound is born a "natural" athlete. It's just a matter of that person finding the activity and the special part of that activity for which nature has suited him. The idea that certain people are born to be hockey, basketball or tennis players and so become great athletes is, to put it in popular words—"a lot of guff!"

Any psychologist will tell you that a person can't be born with skills of any type. They must be acquired through practice of the right kind. People are born only with physical and mental powers or talents that can be well adapted to certain activities. For example, a person may be born with the type of body that is an ideal type for swimming and another person may be born with the type of body that is perfect for running the half mile. What causes trouble is that you will so often find a person with a body very suitable for swimming trying to run the half mile and the person with the half-mile type of body trying to be a distance swimmer or a shot putter.

No matter whether you are playing the game for competitive fame or just for the fun of it, the best plan is to test yourself carefully so that you find out the game and the part of that particular game for which you are best suited by nature.

So remember, everyone is born a "natural" athlete! All you have to do is find the spot that nature has reserved for you. The great athlete is made when he selects the game for which he is best suited, and then uses all the other secrets of success—he is never born a great athlete!

The Importance Of the Placement Kick

In practically every game the average team has a chance to score 21 points from "place" kicks alone! However, they rarely do so because for one thing they rarely try to

score with a "placement" and the average team hasn't got a good "place" kicker who can get the ball over the bar with any regularity. Another point to remember is that an average of half the touchdowns are never converted.

So take a tip and improve your chances of making the team by getting in extra sessions of "place kicking". It could easily be the difference in a tight game.

How To Treat a Stitch!

Medical experts claim the most logical cause of a stitch is the formation of intestinal gas.

Most stitches will go away if you continue what you are doing but sometimes the stitch is so severe that it becomes more and more painful until you can't stand it. When this happens the best thing to do is to stop and raise the arm on the side on which you have the stitch. Really stretch it upwards. Rubbing and massaging and bending at the waist also helps.

Remember, a stitch in the side is not serious so always try to keep going as hard as you can.

The Hockey Handbook, the first really comprehensive book ever written about ice hockey, is a must for all hockey players. It is packed full of the latest information on techniques, skill development and the coaching of hockey.

The Hockey Handbook is ideal for player, coach and spectator. To get your copy of this outstanding wealth of information send a money order for \$3.50 plus 10c to cover postage to: Sports College, Box 99, Toronto 1, Ont., and your order will be filled immediately.

World Happenings Briefly Told

Queen Mother Elizabeth is expected to arrive in Southern Rhodesia near the start of next July to open the Central African Rhodes Centenary Exhibition at Bulawayo.

James Magennis, 31, who sold his Victoria Cross in Belfast, Ireland, for £70 so he could buy new clothes for his three children, got it back—for nothing. The dealer to whom he sold it decided to return it.

Post Office authorities in Brighton, England, are attaching meters to telephones in houses which share a party line. They will save neighbors from arguing over their joint account.

The Government of India has recommended that as far as possible villagers should contribute either labor or cash toward village development projects now being carried out in wide areas.

For the third time in 100 years St. Leonard's Church in St. John's, Isle of Wight, will be rebuilt. The first church was blown down in a gale and the second was destroyed by fire. The third was wrecked by German bombers.

COMMANDER OF ATHABASKAN—Commander John C. Reed of Victoria will succeed Capt. Dudley King of Vancouver as commander of H.M.C.S. Athabaskan when the destroyer sets sail from Esquimalt, B.C., on her third tour of duty in Korea. Cmdr. Reed was formerly chief of staff to the flag officer, Atlantic coast, and stationed at Halifax.—Central Press Canadian.

Accident Total In Manitoba Increased

WINNIPEG.—Twenty-seven persons died in Manitoba during September in accidents other than traffic, W. Trevor Davies, provincial director of safety, said.

This compared with 40 fatalities in August and 19 for September, 1951. One person died in an industrial accident, eight in homes and 18 general.

Total fatalities for the nine month period were 235 compared with 226 for the same period last year.

Kitchen Meditations By JANE DALE

MEMORIES OF BEAUTY

Rich has been the harvest, of field, of vine, and tree.
The flowers and the grasses have thrived abundantly.
Through all the months of summer rare beauty had held sway
And, now as autumn lingers, traces of fairness stay.
The asters in their glory—pansies and daisies too
Grace walks and garden pathways in brilliant warming hue.
Beyond the yellow stubble shorn close of golden grain
The poplars and the maples are brightly clothed again.
Yes, brief may be this beauty; short lived the warm clear days;
The flowers soon may perish along the garden ways;
The trees may lose their splendour; the sky its smiling grace,
And for a time October of beauty may have no trace.
Yet while in preparation for the earth's long time of rest
Each day will have its bright times; each night with leisure blest.
As winter in its bleakness binds all with ice and snow
These memories of beauty will sustain us as we go.

The largest living kangaroos have heads about the size of a sheep.

Weekly Tip

DRIVING NAILS

Nails can be driven into hard wood without difficulty if the nails are dipped into oil or grease, or the points are rubbed over a cake of soap. This also applies to screws.

CAN BE BEATEN THIN

Gold is the most ductile metal known, and can be beaten to leaves of extreme thinness, one ounce providing as much as 300 square feet of leaf.

INCREASING RAPIDLY

The population of the United States is increasing at the rate of about 2,500,000 persons yearly.

Today is yesterday's pupil.

PRISCILLA'S POP—Better to Give

—By Al Vermeer

For Next Few Years

University Graduate Shortage In Several Professions Expected

OTTAWA. — According to Labor Minister Milton Gregg a shortage of university graduates could be expected in several professions for the next few years. The labor department estimated that about 2,000 graduate engineers of all types would be required by Canadian employers each year "for some years to come." This year about 3,000 students are enrolled in engineering courses.

"According to present enrolments in engineering, only slightly more than 1,000 engineering students can be expected to graduate each year for at least the next three or four years," Gregg said.

"There has been a steadily increasing demand for graduates in commerce and business administration during the postwar years. The three broad fields for commerce graduates are industry, financial firms, and accountancy. Nearly all firms in this category report a tendency toward a much wider use of people with university training and they expect this trend to continue.

Gregg said there was also "a very definite shortage" in dentistry. About 200 dentists are expected to graduate each year for the next few years, but more than 100 veteran dentists retire or die each year.

"There appears no prospect of the shortage of dentists being overcome in the foreseeable future," Gregg said.

He said a "decided shortage" also would continue for several years among pharmacists.

Gregg said that postwar classes were abnormally large in the field of forestry, but an increased use of graduates in forestry in both management and logging operations has resulted in the large classes being absorbed successfully.

"Present indications are that there

Distinguishing Autumn Leaves

Before the advent of winter snow and cold, many motorists enjoy a final glimpse of nature in all its glory. The tints of autumn landscapes appeal to some people more than the fragrant odors of spring, or the refreshing scenes of verdant summer.

Shades of yellow and orange are in the leaves during the entire sum-

mer, but are not noticed because of the presence of chlorophyll, a green substance which enables the foliage to derive energy from sunlight. With the approach of cold weather and the ending of the growing season, the green coloring is withdrawn from the leaves and stored for another season, or it is killed by the gradual formation of a thin layer of cells where the leaf is attached to the twig, shutting off further flow of sap, thus finally causing the leaf to fall.

The most delicate, as well as the most brilliant colors of red, scarlet, flaming scarlet, and burnt orange are formed by sugar manufactured by the leaves and left after the growing season. Other chemical substances such as tannin and accumulated toxins either act on the sugars or in themselves give variations in the red and orange colorations. While frosts are not necessary for the turning of the leaves, they do accentuate and hasten the autumn coloration.

The following table will aid autumn visitors in distinguishing the different hardwoods by leaf coloration:

American Elm, yellow.
Ash, yellow to dark purple.
Basswood, yellow.
Beech, clear yellow.
Birches, bright to orange yellow.
Box Elder, bright yellow.
Butternut, yellow.
Hawthorn, brilliant colors and fruit.
Hazelnut, brownish yellow.
Mountain Ash, clear yellow, red berries.
Mountain Maple, yellow and scarlet.
Poplar, yellow and golden.
Red Maple, scarlet and orange.
Red Oak, dark red.
Scarlet Oak, brilliant scarlet.
Shad Bush, bright clear yellow.
Sugar Maple, yellow to orange and scarlet.
Silver Maple, pale yellow.
Striped Maple, light yellow.
Sumac, brilliant red.
Tupelo, flaming red.
White Oak, deep red to orange brown.
Willows, light yellow.
Witch Hazel, yellow orange, rarely purple.

—Sunshine Magazine.

Residents Moved Village Nearer To The Airfield

FAIRBANKS, Alaska. — The village of Huslia in interior Alaska some time back petitioned the Alaska Department of Aeronautics for a new airstrip. The department was forced to locate it two miles from the village. The 2,400-foot strip was finished recently and Huslia's residents promptly began moving their village, bag and baggage, to the edge of the airfield.

Smile Of The Week

Three men were repairing the telephone wires. Betty drove along the road in her car, and when she saw the men climbing the poles she said: "Look at those people—you'd think I had never driven a car before."

Actions speak louder than words.

Excellent Beet Crop In Manitoba

WINNIPEG. — Several hundred Manitoba beet growers will receive a total of \$1,250,000.

Cheques for approximately that amount mailed by the Manitoba Sugar Company, Fort Garry, to contract growers as an initial payment for beets delivered in September.

Company officials said that the initial payment of \$9.40 a ton was the "highest on record." Last year's payment was \$8 a ton.

For the 1951 crop, farmers received a total of \$14.30 a ton. Company officials declined to speculate on what this year's final payment would be.

Quality of the crop, including purity and sugar content, was reported "considerably better than in previous years."

FIRE TO WAREHOUSE SHIPPING CLERK SET

WINNIPEG. — A shipping clerk who set fire to his employers' warehouse because he was fed up with his job is serving 30 months in jail.

Damage was set at \$50,000 when flames swept the warehouse of Lumber Dealers' Supply.

George McLaren, 43, pleaded guilty to setting the fire because "I just wanted to make it . . . awkward for them."

Saskatchewan Town Is In Centre Of Rich Oil Basin

ESTEVAN, Sask.—When Estevan's ship comes in the border town's 4,000 residents confidently expect that it will be fully laden with a cargo of light oil. The ship is strictly dream-boat stuff but the oil is no pipe dream. Oil "hot spot" of the prairie is a phrase that reverberates up and down the Souris River Valley and echoes back from the Williston basin.

Mayor Harry Nicholson says "oil prospects in the Estevan area look good." Along Main Street casual conversation will not get far before somebody talks of a derrick, sinks a deep-test well and from there on the discussion wades through a sea of oil—Estevan's sea.

How come all this optimism? Well, it's part geography, part geology, the favorable circumstance of an old ocean bed and the fact that promising discoveries of oil have been made in territory adjacent to and geologically associated with the Estevan terrain.

Estevan is in the Williston basin. Some 300,000 square miles of this basin run through Montana, North and South Dakota, Manitoba and Saskatchewan. American oil experts have said that this ancient sea channel may prove the biggest of all

United States oil fields.

The picture is shaping up that way. At Tioga, N.D., some 55 miles south of Estevan, there now are about 50 commercial wells producing light oil. Other discoveries have been made in North Dakota within 30 miles of Estevan.

Interesting things are also happening on the Canadian side of the border. At Ratcliffe, some 40 miles west of Estevan, test drilling is going ahead in expectation of finding the light-oil zone that proved to be so productive in the Tioga-Williston area of North Dakota.

A small amount of light oil has been found at shallow depth near Tilston, Man., 90 miles northeast of Estevan and in the basin area.

Oil leases in the Estevan area, which once went for 10 cents an acre, now have reached a high of \$25 an acre. The town holds mineral rights on 105 acres for which it turned down \$25 an acre for oil-lease rights. This property is one of the few parcels of freehold land in the area still unleased.

Oil leases at Ratcliffe now are going for as high as \$65 an acre. Recently, a farmer of the Torquay district 25 miles west of Estevan was offered \$30 an acre plus a bonus of \$150,000 if oil was found on his property. He turned down the offer.

Farmers are being made tempting offers for oil leases and mineral rights but, with good grain crops this year, they are not rushing to grab the offers. Those who let their acreage go for as little as 10 cents a few years ago now are regretting their haste.

One farmer in the Crosby, N.D., area 28 miles southwest of Estevan reported he had received \$50 an acre for his section of land. Others in North Dakota are reported getting as high as \$350 an acre.

Partridge Came To Breakfast And Stayed For Dinner

ALMONTE.—A partridge came for breakfast at the home of Mr. and Mrs. Russell McIntosh here — but didn't reckon on staying for dinner.

The McIntosh family was startled one morning recently by the crash of glass. On investigating they found a fair-sized partridge lying on the dining room table.

As well as smashing a pane in the dining room window, the bird tore the curtains before thudding down on the table with a broken neck.

This was the second partridge to mistake a window for the wide open spaces in one week.

Quick Canadian Quiz

1. The St. Mary River irrigation dam in Alberta is the world's largest earthen dam. What are its dimensions?
2. For clothes and personal furnishings Canadians spent last year \$118 for every man, woman and child. Were per capita tax payments more, or less?
3. From St. John's, Nfld., to Halifax, N.S., is how far by boat?
4. A new 360-railway line is being built where in Canada?

Bang's Disease

Fifth in Series by
Dr. E.E. Ballantyne
Director of Vet. Services
Alta. Dept. of Agriculture

Every cattleman should know how Bang's disease is spread because if it is introduced into a clean herd he may lose practically a whole calf herd. Losing even 10 calves will mean at least \$3,000.00 less in income two years later at present day prices. Very few cattlemen can stand a loss like that. But it can happen and has happened in Alberta. In fact, one cattleman estimated that his in-

come was \$15,000.00 less a couple of years ago on account of Bang's disease in his herd.

Bang's disease is usually "bought and paid for." That is, it is usually introduced into a herd by buying a diseased animal. This can be prevented by having herd additions blood tested first by your veterinarian. After the purchase of a Bang's infected animal, the disease over a period of several months usually spreads through the herd causing many abortions. Not every cow or heifer will necessarily lose its calf, because some seem to have a natural resistance. Abortion storms in which a high percentage of cows lose calves are fairly common. The dangerous period is Bang's disease bacteria. Other cause the fluids, premature calf

and afterbirth are loaded with Bang's disease bacteria. Other cows or heifers licking or eating this can become infected. This is why cows at calving time should be put in a box stall so that if the cow is infected others will not have a chance to pick up the bacteria. — The afterbirth, premature calf, bedding, etc. should be buried deeply or burnt so that other cows cannot eat it. When the cow is taken out in two or three weeks the box stall should be thoroughly cleaned and disinfected. An infected bull will spread the disease occasionally, but very seldom. It is spread mainly as explained above. Your veterinarian is trained in Bang's disease diagnosis, prevention and control, so please consult him when premature calves are

born. An ounce of prevention is still worth a pound of cure. REMEMBER too that Bang's disease causes undulant fever in humans. Contact him to vaccinate your calves or list them with your District Agriculturist or Agriculture Service Board.

The Alberta Department of Agriculture recommends calfhood vaccination coupled with good herd management as an economical and practical way to prevent and control the disease. The co-operation of all cattlemen will be greatly appreciated in building up Bang's resistant herds by having all heifer calves vaccinated this fall.

In 1940, 1941 and 1942 there were many dead calves born prematurely in the University of Alberta herd. A blood test by a veterinar-

ian showed that the cause was Bang's disease. Calfhood vaccination had just been recognized, so it was decided to carry on an experiment in co-operation with the veterinarians of the Alberta Department of Agriculture. All heifer calves were vaccinated at the proper age to build up a resistance against Bang's disease. When these animals matured and went into the milking line or beef herd, infected cows were sold for slaughter. There has been no abortions due to Bang's disease since 1947. (Dairymen and ranchers in Alberta have had equally as good results.) A Bang's infected cow usually only loses one calf and then builds up a natural immunity so that she gives birth to normal calves after that. The odd cow becomes sterile—but not many.

Chevrolet's great valve-in-head engine is centered, poised and cushioned in rubber by high-side mountings. Vibration and power impulses are screened out. Performance is smoother under all driving conditions.

UNITIZED KNEE-ACTION RIDE

For your greater comfort, Chevrolet's entire front suspension system is assembled and balanced as a separate unit. That's one important reason why Chevrolet's Knee-Action ride is so outstandingly smooth.

OUR COMPLETE SHORT STORY—

The Girl With the Green Parasol

By Helen Langworthy

OFFICER O'DAY was amazed when a sleek town car slid up in front of the Martin Jewelry Store and the chauffeur stared straight ahead instead of leaping to the assistance of his beautiful passenger. Officer O'Day hurried to open the car door.

A very attractive young woman met his glance with startled eyes. "Thank you," she murmured huskily. Officer O'Day removed his cap with a flourish. He watched her trim figure and smiled his approval.

The Martin Jewelry Store was deserted at this hour except for Mr. Martin and his old bookkeeper at the back of the store. Mr. Martin eagerly came forward to wait upon the woman.

"I'd like to see some diamond rings," she told him.

While Mr. Martin carried trays from the safe he looked at the woman with narrowed eyes. He noticed that this customer's dark green coat and close-fitting hat looked new—and rich. Of all things, she carried a matching parasol! With her costume it appeared right and proper. Mr. Martin selected his most expensive stock of diamonds to display.

A happy smile lit up the woman's face as she picked up the most valuable ring of the display. She tried the ring on and moved her slim fingers to watch the glint of light.

"You know," she confided in her husky voice, "I made some money, a wise investment. I think I've earned a diamond."

"An excellent idea," Mr. Martin said pompously and beamed. He watched her raise her hand to inspect the ring closely. At that instant the loop of her parasol slid off her wrist and it hit the floor with a dull thud.

The woman bent to retrieve it. "These others," she continued, "I wonder if I might care for one of them?"

A slight frown crossed Mr. Martin's face. He wanted very much to sell the expensive ring. He praised it all he dared. With anxious eyes he watched her finger the less expensive diamonds. Mr. Martin would have been even more anxious if he had been able to see on the other

side of the counter.

Slowly, very carefully, the woman's left hand slid down the handle of her parasol, down to the framework, and dropped the diamond among the folds.

The instant that it dropped the woman slid the other rings into a little pile. She smiled ruefully as she admitted, "I can't quite decide now." Pulling on her gloves she told him, "I'll return in an hour or two." The straight-forward look she gave him made Mr. Martin's cheeks glow dull red.

That was a wonderful idea, she was thinking, to place the diamonds in a pile. It would take Mr. Martin a few moments to sort his rings. Five more precious minutes! She walked briskly a few feet. Now confidence, nothing could go wrong.

Mr. Martin kept pace with her on his side of the counter. He was entirely confident she would return and he had a feeling she wanted the expensive diamond.

The woman stopped short when she saw a display of bright compacts. "Oh, aren't they adorable?" she breathed. Quickly Mr. Martin placed a half dozen on the counter.

The woman glanced at her tiny wrist watch and said doubtfully, "Really, I shouldn't." Of course she shouldn't. Jim out there in the car would be fuming. They had planned she would take exactly fifteen minutes. Jim would have the motor running now. He would drive to a certain garage. Different clothing was laid out there. They had planned carefully. Before Mr. Martin discovered his loss they would be speeding away in another car to "parts unknown". The garagemen would paint the big town car. There weren't going to be any slip-ups.

But what of a measly little five minutes, the woman thought contemptuously. Jim could wait. Leisurely she opened the compacts. There was a brightly jewelled one she preferred. When she turned away it lay in the folds of her parasol.

She murmured things; no, the diamond would be enough. She smiled at Mr. Martin and glanced at her watch. More than five extra minutes had elapsed. Her heart beat a little faster. She all but counted the steps to the door still talking to Mr. Martin.

Involuntarily she gave a little sigh because she was almost safe. She could see Jim in the car looking murderous. Then her eyes grew wide with horror.

"Nice little rain," Mr. Martin said pleasantly from behind her. Nice-little-rain!

She hesitated with the door ajar as six foot three of Irish policeman strode up. Officer O'Day smiled broadly. "Just a shower, it started five minutes ago," he said and motioned to her parasol. "You're lucky to have that. Let me—"

"Oh, no!" The woman's voice was strangely frightened. "It doesn't work," she said quickly and held the parasol tight to her body.

Patrick O'Day was positive a lady's parasol would have to yield to him. "I can fix it," he said and pulled the parasol from the woman's convulsive grip.

Patrick O'Day raised the parasol slowly, peering at the framework. There was the crash of the compact as it hit the sidewalk and the light tinkle of the diamond ring as it hit and bounced. That incredulous expression on the officer's face, his mouth open; Mr. Martin screaming and waving his arms, and Jim pulling away from the curb and roaring down the street—all was lost.

Sets Record For Wheat Shipments

Shipments of wheat through Churchill reached a new record of 8,600,000 bushels during the 1952 season. The shipping season has ended.

This was announced by W. C. McNamara, assistant chief commissioner of the Canadian wheat board.

A total of 26 vessels carried the wheat to overseas markets. This compares with 21 vessels loaded and 7,300,000 bushels shipped during the 1951 season.

Shipping through Churchill began Aug. 2 this season with the loading of the Warkworth, and concluded with the loading of the Glueckauf.

There was some bunching of ocean vessels arriving at Churchill, but the movement of grain to the port and the loading of vessels was carried out according to plan, Mr. McNamara said.

He said the board will continue to fill the elevator at the port, with a capacity of 2,500,000 bushels, is filled.

SELECTED

Recipe

GOLD LAYER CAKE

Give this light, tender, rather open-textured cake your choice of filling and frosting . . . a little different, and good eating!

1½ cups once-sifted pastry flour or 1½ cups once-sifted all-purpose flour

2½ teaspoons Magic Baking Powder

½ teaspoon salt

6 tablespoons butter or Blue Bonnet Margarine

¾ cup fine granulated sugar

3 egg yolks, well beaten

½ cup milk

½ teaspoon vanilla

Grease two 8-inch round layer-cake pans and line bottoms with greased paper.

Preheat oven to 375 deg. F. (moderately hot).

Sift flour, Magic Baking Powder and salt together three times.

Cream butter or margarine; gradually blend in sugar. Beat in well-beaten egg yolks.

Measure milk and add vanilla.

Add flour mixture to creamed mixture about a quarter at a time, alternating with three additions of milk and combining lightly after each addition.

Turn into prepared pans.

Bake in preheated oven 20 to 25 minutes.

WESTERN BRIEFS

Announce New Program

VANCOUVER.—The British Columbia government recently announced a civil defence preparedness program—including a \$132,616 expenditure—aimed at stepping up civil defence organizations. The Cabinet decided to match the federal government's \$132,000 with an equal amount to meet organization and equipment expenses.

Very Old Church

WINNIPEG.—Old Kildonan Presbyterian Church celebrated its 101st anniversary with special services. It was the first Presbyterian church of the Selkirk settlers, and its original pastor, Rev. John Black, was the first Presbyterian minister in the West.

Archaeologists Busy

GILBERT PLAINS, Man. — The flint head of an ancient weapon has started federal archaeologists on a hunt for traces of primitive man

near this town 90 miles northwest of Brandon. Recently a "plainview" projectile point was found in the collection of Joe Gelsen of Gilbert Plains. The find prompted Dr. R. S. MacNeish of Ottawa to launch a survey of the district and test excavations of the site where the point was found.

Airman Promoted

CALGARY.—CMG (Con) Farrell, 53, veteran fighter of the First World War and former bush pilot, has been appointed manager of Canadian Pacific Airlines' repair depot here. He succeeds W. R. (Wop) May, who died this summer.

New Centre Opened

VANCOUVER.—A \$700,000 cancer treatment centre, housing a two-ton cobalt "bomb", was opened here by Lieut.-Gov. Clarence Wallace. For the distinguished guests and spectators, the centre of attraction was the "bomb", housed in a lead-lined shield weighing 3,500 pounds.

THE TILLERS

—By Les Carroll

TRENCHUK-HUETHER

A beautiful wedding was solemnized at the Rosebud Seventh-day Adventist church Sunday evening, November 23, when Della Huether of Carbon, daughter of Mr. and Mrs. Albert Huether, became the wife of Joe Trenchuk of Edmonton.

The church was very attractively decorated with autumn leaves, weaved in and out of a trellis work archway.

Attending the bride were: Matron of honor, Elvina Black, sister of the bride; bridesmaids were Evelyn Krenzler, Wanetta Krenzler and Rose Trenchuk; flower girl was Wendy Suelzle, daughter of Mr. and Mrs. Alton Suelzle.

Attending the groom were: Bill Trenchuk, cousin of the groom; Dave Trenchuk, brother of the groom, and Donavon Huether, brother of the bride. Bible boy was Launy Suelzle, son of Charlie Suelzle.

The bride appeared most gorgeous in her gown of satin with lace trimming. She wore the traditional lily point sleeve with lace and the lace insertion in the skirt and down through the train made it most beautiful. She carried an orchid upon a

white bible. Her attendants wore mauve, mauve, green and yellow respectively.

Pastor G. Taylor, President of Alberta Conference of Seventh-day Adventists, officiated. Pianist was Larry Leiske, son of Mr. and Mrs. Sam Leiske. Special music was rendered by Lucy Saylor, sister of the groom, Elvina Black, sister of the bride, and Mr. Rogers, uncle of the bride. All were beautifully presented.

The reception took place in Beiseker Memorial Hall. Mr. John Leiske, Master of Ceremonies, conducted an interesting program which contained good variety. After the program the bride and groom were congratulated before each took their place to be served a delicious lunch.

The gifts to the newlyweds were many and varied. The groom's response to the toast to the bride, and the bride's speech made known the many thanks for all gifts received and the willing help of their many friends.

Della and Joe went south for their honeymoon, and upon their return will reside in Edmonton. Best wishes from all to Mr. and Mrs. Joe Trenchuk.

HUETHER-SELL

A pretty wedding took place

in the Level Land S.D.A. church when Miss Ruth Sell and Richard Huether were united in marriage. Ruth Sell is the daughter of Mrs. Emma Sell of Calgary, and Richard Huether is the son of Mr. and Mrs. Reinhold Huether of Beiseker.

The church was nicely decorated with baskets of autumn flowers and pine boughs. The service was conducted by Pastor C. C. Voth of Calgary. The bride was given in marriage by her brother, Herman of Calgary.

The bride chose to wear an ankle length satin gown. The veil of illusion net was caught to a close-fitting headdress of organdy, direct from Germany, and she carried a bouquet of red roses and white mums.

Tones of blue, orchid, yellow and green were worn by the matron of honor, Miss Christa Sell, and bridesmaids, Mrs. Vernon Kaiser, Mrs. Ervin Dahlke and Phyllis Littman. Each carried a contrasting bouquet of carnations and chrysanthemums.

The groom was attended by Bert Fruman of B.C., Vern Kaiser, Ervin Dahlke, Bill Huether, all of Calgary.

Loanna Suelzle was flower girl, wearing a yellow organdy frock, and carried a basket of harmonizing chrysanthemums. Douglas Dick was Bible boy.

Mrs. John Kaiser was pianist. Mrs. Leinweber sang "O Promise Me," and Bob Koronko of College Heights sang "The Lord's Prayer."

Reception followed immediately in the Beiseker Hall. There was a good program.

For travelling the bride wore a blue suit with black accessories.

The couple will reside in the Level Land district near Beiseker.

Is Your Seed True-To-Variety

Each year, during the last 12 years (1941-52), the Line Elevators Farm Service field-tested hundreds of farmers' seed stocks of wheat and barley to find out if they were "true" or "pure" to variety. The results obtained in 1951 and 1952 are shown in the following table:

Crop and year seed sown	Seed samples tested	Percentage of samples	
		"Pure" as to variety	"Impure" as to variety
WHEAT			
1951	1,778	84.8	15.2
1952	1,446	84.2	15.8
BARLEY			
1951	453	73.0	27.0
1952	445	72.8	27.2

These figures show that 15% and 27% of the seed stocks of wheat and barley, respectively, held by prairie farmers for planting in 1951 and 1952 were not satisfactorily true-to-variety. As a matter of fact, over one-half of the seed samples listed as "Impure" in the above table were very badly mixed as to variety. When grown, they produced a high percentage of foreign, inferior and off-type plants.

Planting seed-grain of mixed varieties and kinds results in uneven ripening, lower yields and poorer grades. On the other hand, by using seed which is true-to-variety, prairie grain growers can assure themselves of a crop of the highest possible yield and quality.

Is your seed true-to-variety? If not, it will pay you to exchange it for some "pure" seed and by far the safest bet is Registered seed. Large quantities of Registered seed are available this year, and prices are reasonable. Any elevator agent will take your order for Registered seed.

Canadian Infantry...

OUTSTANDING WHEREVER THEY SERVE

Skilled, tough and proud of their reputation, Canadian Infantrymen are the finest fighting soldiers in the world. They are the top men in the Canadian Army. Modern developments have only made the job of Infantry more complex, demanding careful training in many fields.

Wherever they have served, Canadian Infantrymen have distinguished themselves. Today, in Korea and Germany, Canada's Infantry Soldiers are once again demonstrating their superiority.

The Canadian Army needs more of these men. Canada needs more of these Infantry Soldiers to help maintain our security, to help assure our future. For young men with the spirit of adventure, there is challenge and satisfaction in serving with Canada's world-famous Infantry.

You are eligible if you are 17 to 40 years of age, physically fit and can meet Army test requirements. Applicant should bring birth certificate or other proof of age when reporting for interview.
